Professional Summary

Motivated Java Full Stack Developer with a strong foundation in Core Java, Object-Oriented Programming, Data Structures and Algorithms, SQL, and DBMS. Hands-on experience building full-stack applications using Spring Boot, Spring Security, REST APIs, React.js, JPA/Hibernate, and PostgreSQL. Experienced in JWT authentication, role-based access control, database design, and SDLC. Strong problem-solving and collaborative development skills with a focus on building secure and scalable software solutions.

Education

Savitribai Phule Pune University **2022 – 2026**
Bachelor of Engineering in Electronics and Telecommunication *SGPA: 7.17*

Experience

GirlScript Summer of Code (GSSOC) Contributor **2024**

- Ranked 181st among 3,000+ contributors in a national open-source program.
- Contributed to multiple open-source repositories by resolving frontend issues and improving user interfaces.
- Collaborated with contributors through Git and GitHub in a distributed open-source development environment.

AI-ML Virtual Intern - India Edu Program **Oct 2024 – Dec 2024**

- Completed a 10-week virtual internship focused on Artificial Intelligence and Machine Learning.
- Built and evaluated machine learning models using Python on real-world datasets.
- Performed data preprocessing and model evaluation to improve prediction accuracy.

Projects

DisasterConnect | *Java, Spring Boot, Spring Security, JWT, PostgreSQL, React, TypeScript* *Demo* *GitHub*

- Developed and deployed a full-stack emergency-response platform connecting citizens, NGOs, volunteers, and administrators for coordinated resource sharing and help-request management.
- Built a **Spring Boot REST backend** using layered architecture, DTOs, validation, **JPA/Hibernate**, and **PostgreSQL**, with **transactional resource reservations** and database-level **pessimistic locking** for concurrent resource allocation.
- Implemented **JWT authentication and role-based access control (RBAC)** for ADMIN, CITIZEN, NGO, and VOLUNTEER roles, along with request history, volunteer assignments, search, filtering, pagination, and sorting.
- Implemented **Spring WebSocket/STOMP** messaging and backend tests for reservation concurrency and rollback scenarios; deployed the frontend on **Vercel** and backend on **Render**.

Focus Booster | *React.js, JavaScript (ES6+), HTML5, CSS3, Vite, Local Storage* *Live*

- Developed a **responsive productivity web application** for task management and focus improvement.
- Built reusable **React components** with efficient state management and a clean, responsive user interface.

Technologies

Languages: Java, JavaScript, TypeScript, SQL
Backend: Spring Boot, Spring Security, JWT, Spring Data JPA, Hibernate, REST APIs, Maven
Frontend: React.js, TypeScript, React Router, Axios, HTML5, CSS3, Bootstrap
Database: PostgreSQL, MySQL
Tools: Git, GitHub, Postman, MySQL Workbench, VS Code, Eclipse, XAMPP, Docker, Vercel
Core Concepts: Core Java, DSA, OOP, DBMS, Operating Systems, Computer Networks, SDLC

Achievements

- Secured a global rank of 11,451 in TCS CodeVita Season 13 for competitive coding.
- Qualified for Round 2 – Online Pitching in VIT CODE APEX 2.0.
- Completed the AWS Solutions Architecture Job Simulation by Forage.
- Participated in TensorX National AI Hackathon 2026.
